

TOOTHACHE AND EARACHE

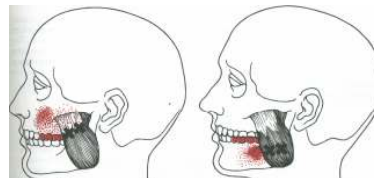

Re-occurring toothache or earache while the tooth or ear seems healthy?

Your toothache and earache patients can benefit from the following treatment.

These muscles are part of a series of muscles that can cause recurrent toothache, earache and jawpain

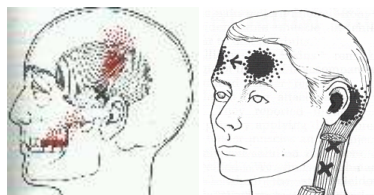

Temporalis muscle

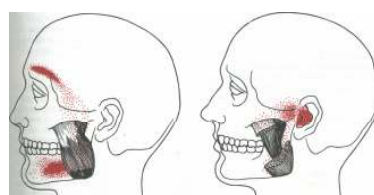

Masseter muscle

Our busy lifestyle often causes daily stress, that can result in overuse in these muscles. Once these muscles are irritated, they can refer pain to the teeth, ear and jaw areas.

Soft tissue release, triggerpoint deactivation and relaxation therapy are treatments we use to relieve this referred pain.

Temporalis & SCM muscles

Masseter muscle

Please feel free to contact us if you would like to discuss the above, or if you would like to refer a patient,
